

The surest, easiest way to mitigate your supply chain risks

SRS's Unique Risk Prevention Capabilities

Senior executives expect production to continue no matter what. Yet a supply chain disruption can result in immediate losses and limit subsequent growth. SRS provides unique capabilities to protect your sourcing:

	<u>SRS</u>	<u>Others</u>

Supplier risk assessment	✓	✓
Data is yours to keep forever	✓	✗
Proven outage prevention	✓	✗
Bankruptcy risk (90% accuracy)	✓	✗

SupplyRisk Prevent™

SRS offers the only program proven to help suppliers prevent disruptions by taking proactive actions tailored to their situation. Our SupplyRisk Prevent™ program has five main steps:

1. **Assess** suppliers with a secure web BCP survey
2. **Predict** factories most likely to suffer a disruption
3. **Assign** risk prevention actions to suppliers
4. **Train** suppliers with instructions and templates
5. **Track**, support, and follow-up

SRS SupplyRisk Prevent™ is uniquely grounded in statistical models, based on millions of site disruption events. The models assign to each supplier site the most effective risk prevention actions to reduce its risks. SRS then assists suppliers through free training, templates, and support.

SRS data proves that suppliers cut production disruptions by 60% by completing SRS risk prevention actions.

SupplyRisk Respond™

SupplyRisk Respond™ collects data from suppliers and combines it with other third party data sources to give you real-time awareness of supplier and logistic threats and their impact on your suppliers. SRS does this in four steps:

1. **Map** production sites and key distribution hubs
2. **Monitor** threats to suppliers, sites, and logistics
3. **Plan** for any “What If” scenario
4. **Communicate** with sites in disaster areas to find out whether they are impacted

First, suppliers enter production sites, key distribution hubs and emergency contacts in the secure SRS website, with 24x365 access for updates. SRS geocodes the locations and provides the data in a reporting portal and phone app.

Second, SRS keeps you informed of supplier, logistics and regulatory threats via push alerts and a daily news summary. SRS analyzes millions of media articles a day for incidents like FDA actions, recalls, shortages, acquisitions, cyber-attack, labor, site fires, seaport/airport closures...

Third, you can analyze risks for unlimited “what if” scenarios and develop contingency plans for them.

Fourth, when supplier production sites are in a disaster area, SRS contacts them to identify which are impacted. Without SRS, your sourcing managers contact all sites in disaster areas. With SRS, they contact only the few impacted sites, saving significant efforts every month while accelerating crisis response.

Real-Time Monitoring Example

Chinese officials suspended travel in and out of Wuhan and several other cities in the Hubei province on January 23, 2020. That day, SRS alerted its customers about the lock-

down and contacted all suppliers in the area to identify impacted sites. Each SRS customer’s reporting portal immediately reflected supplier responses.

The situation continued to deteriorate, and Chinese officials confirmed person-to-person transmission of the virus. As lockdowns spread to other Chinese cities by January 27, SRS contacted all sites in China to identify impacted sites.

As the virus spread internationally, SRS expanded its impact communications accordingly in Southeast Asia, Europe & the USA. Today, SRS follows-up with all suppliers worldwide every other week for an update of Covid-19 impact on their production, which ensures that our customers are always up-to-date.

SupplyRisk Financial™

SRS SupplyRisk Financial™ is the only financial risk offering to correlate real-time market data & financial filings. The result is early and accurate bankruptcy prediction for all public companies in your BCP program. **SRS predicts over 90% of public and private bankruptcies 1-2 years in advance.**

Other financial risk services ignore market data. That is a fatal flaw. Markets react instantly and have proven predictive power. Using markets plus financial reports provides earlier and more accurate prediction than financial reports alone.

	SRS	DnB	RapidRatings
Constantly revised by market data	✓	✗	✗
Covers every stock in the world	✓	✗	✗
Financial reports	✓	✗	✓
Credit reports	✗	✓	✗
90% accuracy 1-2 years ahead	✓	✗	?

SRS can also collect financial information from private suppliers. They complete the SRS financial template for upload into SRS’ secure and encrypted website. SRS automatically reads the data and produces financial reports in your SRS portal.

Suppliers Control Their Data in a Free Platform

Suppliers save time by completing a [secure risk assessment](#) and

decide which customers have access. Data is encrypted in Azure and is never shared without supplier permission. SRS adheres to a strict [Privacy and Security Policy](#), and is certified to international standards of the [EU-US Privacy Shield Framework](#).

Fully-Managed Digital Risk Service

SRS manages the supplier risk prevention process:

1. **Set up:** suppliers & contacts
2. **Mapping:** SRS contacts suppliers to enter production sites and logistics hubs.
3. **Assess Risks:** Suppliers complete SRS predictive risk assessment.
4. **Instant Alerts** for supplier & logistics incidents.
5. **Impact Survey:** SRS surveys 100% of suppliers & sub-tier sites in disaster areas to identify impacted sites.
6. **Risk Prevention:** SRS gives suppliers risk actions, free training & support.
7. **Scale:** Easily add and change suppliers.

About SRS

SRS was founded in 2007 with a vision to reduce production disruptions across entire supply chains. SRS helps healthcare providers and suppliers to predict and prevent disruptions, thereby saving lives through resilient patient care.

Supply risk programs are only as valuable as the disruptions they prevent. That is why SRS PredictLens™ employs its [patented](#) technology to give suppliers the resources they need to proactively cut production disruptions by 60%.
