

## SRS Is a Secure Data Sharing Platform

Founded in Silicon Valley in 2007, Supply Risk Solutions (SRS) is a secure, permission-based platform that aggregates supplier data for their customers while keeping suppliers completely in control of their data.

Suppliers complete a standard request about their business continuity risk management procedures and may enable viewing by multiple customers that use SRS. It takes under an hour to complete the request. This makes SRS very efficient way for suppliers to strengthen relationships with customers.

Suppliers can add, change, and delete data at any time, and decide which data to share with customers. Data is never shared without your permission.

## Bank-Level Security

Guarding your data is essential to our business. That is why the data is encrypted in state-of-the-art Microsoft Azure data centers protected around the clock by guards, firewalls, server monitoring, independent security tests, and audits.

## SRS Is Legally Bound to Protect Your Data

SRS is certified to the [EU-US Privacy Shield Framework](#), with legal commitments to privacy enforced by the US FTC. SRS is committed to our rigorous [Privacy and Security Policy](#).

## Supplier Benefits from SRS

Supplier receive free benefits from using SRS:

- ✓ Meet customers' requirements
- ✓ Save time by entering data once for multiple customers
- ✓ Enter data securely & control who can view it
- ✓ Receive alerts for disasters near your sites
- ✓ Receive feedback & free resources to improve resilience

## How the SRS Platform Works for Suppliers

The process for suppliers is simple and saves you time:

1. Open your browser to <https://supplier.supplyrisk.com>
2. Enter your email address, click Next, then click "Password Reset" and follow the instructions to get your password
3. Click Yes in each row in the Data Sharing tab
4. Enter the requested data in each tab and click Submit
5. You will receive free alerts from SRS if any of your sites are in a current natural disaster area. Simply click the link in the alert to let customers know if you are impacted.

## About SRS

SRS is committed to helping suppliers strengthen their relationship with their customers. We are a California corporation founded in 2007 with over 17,000 users. To learn more about SRS, please visit our website [www.supplyrisk.com](http://www.supplyrisk.com).
