

## SRS Is a Secure Data Sharing Platform

Supply Risk Solutions (SRS) is a secure, permission-based platform that keeps suppliers completely in control of their data. Suppliers can add, change, and delete data at any time, and decide which data to share with individual customers. Data is never shared without your permission.

The Data Sharing Controls feature gives suppliers fined-grained control of data viewing by specific customers. For example, you decide which contact and site information, if any, to share with each customer, and which customers can view assessment responses.

## Bank-Level Security

Guarding your data is essential to our business. That is why we store the data in state-of-the-art Microsoft Azure data centers protected around the clock by guards, firewalls, data encryption, server monitoring, independent security tests, and audits. [Security Scorecard](#) rated our security as better than the average financial institution every month since 2019.

## SRS Is Legally Bound to Protect Your Data

SRS is certified to the [EU-US Privacy Shield Framework](#), whose legal commitments to privacy are enforced by the US FTC. SRS is legally obligated by NDA to guard your data against any unauthorized disclosure. SRS is committed to a rigorous [Privacy and Security Policy](#).

## How the SRS Platform Works for Suppliers

The process for suppliers is simple and saves you time:

1. Your customer emails you to introduce SRS.
2. Click the “Password Reminder” link at the secure SRS site <https://supplier.supplyrisk.com> to get your password. Your email is your login.
3. Log in & enter requested data. Email questions to SRS support ([bcmsupport@supplyrisk.com](mailto:bcmsupport@supplyrisk.com))
4. Click “Data Sharing Controls” link in the Conclusion tab to decide with whom to share data.
5. Access free SRS training and templates to improve your risk management (optional).
6. SRS emails your emergency contacts if a natural disaster hits your factory locations to ask if customer deliveries will be impacted.

## Supplier Benefits from SRS

The benefits for suppliers using SRS (for free) are:

- Meet customer requirements
- Save time by entering data once for multiple customers
- Update data securely & control who can view it
- Receive alerts for disasters near your sites
- Receive feedback on how to improve resilience

## About SRS

SRS is dedicated to helping suppliers to achieve these benefits. We are a California corporation founded in 2007 with over 16,000 users. To learn more about SRS, please visit our website [www.supplyrisk.com](http://www.supplyrisk.com).
